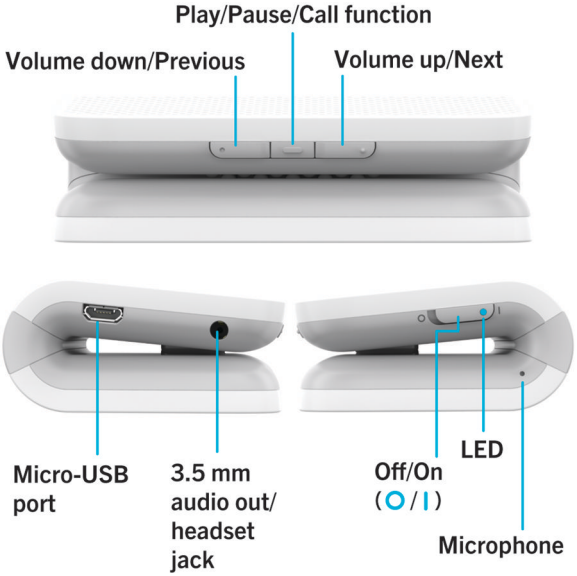
Getting started

About the BlackBerry Mini Stereo Speaker

The BlackBerry Mini Stereo Speaker is a Bluetooth enabled device with an integrated speakerphone that you can use to answer incoming calls or make calls using voice dialing, as well as listen to music from your BlackBerry device. You can also use the audio out port of the BlackBerry Mini Stereo Speaker to play audio files saved on your BlackBerry device on your stereo system or headset, or to listen to your calls. If you have a location-based application that provides driving directions on your BlackBerry device (such as BlackBerry Traffic), the BlackBerry Mini Stereo Speaker will announce these driving directions to you. With its unique clip-on design, the BlackBerry Mini Stereo Speaker can be carried with you; just attach the BlackBerry Mini Stereo Speaker to your backpack and share your music with your friends!

Components



Safety information

Before you start using the BlackBerry Mini Stereo Speaker or any accessories provided with the speaker, please read the safety and operation instructions in this guide. Keep this guide in a safe place so that you can refer to it whenever you need it.

The speaker supports 128-bit encryption software. In some countries there may be restrictions on using Bluetooth enabled and wireless devices with encryption software. Check with your local authorities for the restrictions in your area.

> Important: In some countries, regions, states, or provinces there might be restrictions on the use of any mobile devices while driving. You are responsible for knowing and complying with the local laws and regulations in the area that you use the speaker.

To find the latest safety and product information, visit www.blackberry.com/go/docs.

Pairing the speaker

Pair and connect your speaker with your BlackBerry device

Before you can use your BlackBerry Mini Stereo Speaker, you need to pair it with your BlackBerry device. When you turn on the speaker for the first time, it's already in pairing mode.

1. Slide the power switch on your speaker to the **On** position.
2. On your BlackBerry device, do one of the following:
   - For devices running BlackBerry Device Software 7.x, click the **Manage Connections** icon > **Networks and Connections** > **Bluetooth Connections** > **Turn Bluetooth On** > **Add New Device** > **Search**.
   - For devices running BlackBerry 10 OS, swipe down from the top of the home screen. Tap **Bluetooth** and make sure Bluetooth is on.
3. Click **BlackBerry Mini Stereo Speaker**.
4. If you receive a prompt to enter a passkey, on your BlackBerry device, type **0000**.
5. Press the key on the keyboard.

If the Bluetooth connection is lost, you can press and hold the **Play/Pause/Call function** button on the speaker for 5 seconds to turn on pairing mode at any time.

To turn off the prompt that appears on your BlackBerry device when connecting and pairing, press the **Menu** key > **Device Properties** and set the **Trusted** field to **Yes**. For more information, click the **Help** icon on the home screen of your BlackBerry device.

For information about how to pair a third-party Bluetooth enabled device with your speaker, see the help that came with that device.

To simultaneously pair your speaker with a second device, press and hold the **Play/Pause/Call function** button for 5 seconds and complete the pairing procedure above.

Using the speaker

Pairing tasks

Action	Play/Pause/Call function button
Turn on pairing mode	Press and hold for 5 seconds, until you hear 3 short beeps.
Cancel pairing mode	Press 1 time.
Clear pairing list	Press and hold for 8 seconds while sliding the power switch to the **On** position, until you hear two long beeps.

Music tasks

Action	Button
Play or pause music	Press **Play/Pause/Call function**.
Increase the volume	Press **Volume up**.
Decrease the volume	Press **Volume down**.
Go to the next song	Press and hold **Volume up**.
Go to the previous song	Press and hold **Volume down**.

Call tasks

Action	Button
Make a call	Press and hold **Play/Pause/Call function** until you hear 1 beep. Say a voice command.
Answer a call	Press **Play/Pause/Call function** 1 time.
End a call	Press **Play/Pause/Call function** 2 times.
Turn on mute	Press **Play/Pause/Call function** 1 time. When mute is turned on, your speaker beeps periodically.

Action	Button
Turn off mute	Press **Play/Pause/Call function** 1 time.
Redial the last phone number	Press **Play/Pause/Call function** 2 times.
Increase the volume	Press **Volume up**.
Decrease the volume	Press **Volume down**.
For simultaneous calls:	
Answer a second call	Press **Play/Pause/Call function** 1 time.
Return to the first call or switch between calls	Press and hold **Play/Pause/Call function** until you hear 1 beep.
Join two calls	Press and hold **Play/Pause/Call function** until you hear 2 beeps.
Ignore a call	Press **Play/Pause/Call function** 2 times.

Charge the speaker

Your BlackBerry Mini Stereo Speaker comes partially charged and ready for use. When the battery power level is low, the red LED will quickly flash on and off.

1. Connect the small end of the micro-USB cable or a car charger to the charging port on the speaker.
2. Do one of the following:
   - Connect the large end of the micro-USB cable to a USB power plug and into a wall outlet, or to the USB port on your computer.
   - Plug a car charger into your car's power outlet.

LED notifications

Red LED	
	Slow flashes: microphone is muted **Quick flashes:** not connected to a device **Quick flashes, followed by a pause:** battery power level is low

Blue LED	
	Flashing: connected to a call **1 slow flash:** turned on and connected to a device **2 quick flashes:** incoming call **5 quick flashes:** reconnecting with the last device that you paired with

Blue and red LED	
	Ready for pairing

Green LED	
	Flashing: turning on or charging **Solid:** fully charged

Troubleshooting

I can't connect the speaker with my device

You might have accidentally deleted the pairing options that you set for your BlackBerry Mini Stereo Speaker. Complete the steps for connecting and pairing your speaker with your BlackBerry device.

I can't hear anything when I use my speaker

Try the following actions:

- Turn up the volume on your BlackBerry Mini Stereo Speaker.
- Turn up the volume on your BlackBerry device.
- Make sure that your speaker is turned on and is connected to your device.

I hear static noise when I use my speaker

The BlackBerry Mini Stereo Speaker is designed to be used within 10 meters (33 feet) of your BlackBerry device, without any large objects in between.

Try the following actions:

- Move away from any large objects that might cause interference.
- Keep your speaker on the same side of your body as your device.

Safety and product information

Important safety information

Tip	Description
	Before you use your BlackBerry Mini Stereo Speaker, it is important that you read the compliance information and the guidelines for the safe use of your speaker that are found in this guide.
	Use only Research In Motion approved chargers. Use of chargers that have not been approved by RIM might present a risk of fire or explosion, which could cause serious harm, death, or property loss.
	Do not rely on your speaker for emergency communications.
	Do not disassemble your speaker. Your speaker contains small parts that might be a choking hazard.
	Keep your speaker away from medical devices, including pacemakers and hearing aids, as they might malfunction causing serious harm or death to you or others.
	Do not put your speaker in contact with liquids as this might cause a short circuit, a fire, or an electric shock.
	Driving a vehicle requires your full attention to road conditions, weather, and vehicular traffic. It is important to set up your speaker prior to driving.
	Do not use your speaker in the presence of gas fumes as it might present a risk of fire or explosion.
	Do not use or store your speaker in temperatures that exceed 113° F (45°C) as the speaker might become hot.
	Do not dispose of your speaker in a fire as this might cause an explosion resulting in serious injury, death, or property loss.
	Turn off your speaker in aircrafts. Using your speaker on an aircraft might affect aircraft instrumentation, communication, and performance; might disrupt the network; might otherwise be dangerous to the operation of the aircraft, its crew, and its passengers; and might be illegal.
	The speaker is not inherently safe and cannot be used in the presence of explosive fumes, explosive dust, or other explosive chemicals. Sparks in such areas could cause an explosion or fire resulting in serious injury, death, or damage to property.

Electrical safety

Charge the BlackBerry Mini Stereo Speaker using only charging accessories specifically approved by Research In Motion Limited (RIM) for use with this speaker. Any approval from RIM under this document must be in writing and must be from a person authorized to provide such approval. Use of any other accessory might invalidate any warranty provided with the speaker and might be dangerous.

Use the charging accessories provided with the speaker or any other RIM approved charging accessories only from the type of power source indicated on the marking label. Before using any power supply, verify that the mains voltage is in accordance with the voltage printed on the power supply.

Do not overload power outlets, extension cords, or convenience receptacles as this might result in a risk of fire or electric shock. To reduce the risk of damage to the cord or the plug, pull the plug rather than the cord when you disconnect the charging accessory from the power outlet or convenience receptacle.

Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where the power cord connects to the speaker. Unplug charging accessories during lightning storms or when unused for long periods of time.

Do not use charging accessories outside or in any area exposed to the elements.

For more information about connecting to the power supply, see the instructions in this guide.

Battery safety and disposal

The BlackBerry Mini Stereo Speaker contains a non-removable lithium-polymer battery. Charge the battery with only the approved BlackBerry charging accessories. Do not attempt to remove the battery. Do not dispose of the speaker in a fire, as the battery might explode. Dispose of the speaker in accordance with the laws and regulations in your area governing disposal of lithium-polymer cell types.

The lithium-polymer battery might present a fire or chemical burn hazard or might explode if mistreated. Do not disassemble, crush, or puncture the lithium-polymer battery. Do not heat the lithium-polymer battery above 140°F (60°C).

Device disposal

The BlackBerry Mini Stereo Speaker should not be placed in household waste bins. Please check local regulations for information about the disposal of electronic products in your area.

Safe use guidelines

- Do not place heavy objects on the BlackBerry Mini Stereo Speaker.
- Do not attempt to modify or service the speaker.
- Do not attempt to cover or push objects into openings on the speaker unless instructed to do so in the documentation supplied by Research In Motion.

Drive safely!

WARNING: Driving a vehicle requires your full attention to road conditions, weather, and vehicular traffic. It is important to set up your BlackBerry Mini Stereo Speaker prior to driving. Using this hands-free accessory may cause you to be distracted and may put you, your passengers, and occupants of other vehicles at risk of suffering bodily injury, death, and/or loss of property. You should only use the hands-free accessory where permitted by law and when you will not be distracted from the proper operation of your motor vehicle.

Many jurisdictions have prohibited the use of wireless devices while driving. You are responsible for knowing and obeying the laws and regulations regarding the use of wireless devices in the areas where you drive.

If your vehicle is equipped with an air bag, do not place the speaker or other objects above the air bag, or in the air bag deployment area. If in-vehicle wireless equipment is improperly stored or installed, and the air bag inflates, serious injury could result.

Radio frequency (RF) signals might affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. If any equipment has been added to your vehicle, you should also consult the manufacturer of that equipment for information on radio frequency signals.

Accessories

Use only those accessories approved by Research In Motion. Using any accessories not approved by RIM for use with this particular BlackBerry Mini Stereo Speaker model might invalidate any approval or warranty that is applicable to the speaker, might result in the non-operation of the speaker, and might be dangerous.

Antenna care

Use only the supplied integrated antenna. Unauthorized antenna modifications or attachments could damage the BlackBerry Mini Stereo Speaker and might violate U.S. Federal Communications Commission (FCC) regulations.

Operating and storage temperatures

Place the BlackBerry Mini Stereo Speaker or BlackBerry Mini Stereo Speaker accessories away from heat sources, such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat. If you are not going to use the speaker for more than 2 weeks, turn off the power.

Follow the operating and storage temperatures listed below:

Speaker operating	32 to 113°F (0 to +45°C)

OPERATING OUTSIDE OF THIS TEMPERATURE RANGE CAN IMPAIR AUDIO QUALITY AND CAUSE BATTERY DAMAGE.

Speaker storage	14 to +131°F (-10 to +55°C)

STORING OUTSIDE OF THIS TEMPERATURE RANGE CAN CAUSE BATTERY DAMAGE.

Interference with electronic equipment

Most modern electronic equipment is shielded from radio frequency signals. However, certain electronic equipment might not be shielded against the radio frequency signals from the BlackBerry Mini Stereo Speaker.

Pacemakers: Consult a physician or the manufacturer of your pacemaker if you have any questions regarding the effect of radio frequency signals on your pacemaker. If you have a pacemaker, verify that you are using the speaker in accordance with the safety requirements associated with your particular pacemaker, which might include the following requirements:

- Always keep the speaker more than 7.88 in. (20 cm) from the pacemaker when the speaker is turned on.
- Do not carry the speaker in your breast pocket.
- If you have any reason to suspect that interference is taking place, turn off the speaker immediately.

Hearing aids: Some digital wireless devices may interfere with some hearing aids. In the event of such interference, consult your wireless service provider or contact the manufacturer of your hearing aid to discuss alternatives.

Other medical devices: If you use any other personal medical device, consult the manufacturer of your device to determine if the device is adequately shielded from external radio frequency energy. Your physician may be able to assist you in obtaining this information.

Health care facilities: Turn off Bluetooth technology on the speaker in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external radio frequency energy.

Aircraft: Federal Aviation Administration (FAA) and Federal Communications Commission (FCC) regulations prohibit using the radio of wireless devices while in the air. Turn off the speaker before boarding an aircraft. The effect of using Bluetooth technology on the speaker in an aircraft is unknown. Such use might affect aircraft instrumentation, communication, and performance, might disrupt the network, might otherwise be dangerous to the operation of the aircraft, and might be illegal.

Dangerous areas

The BlackBerry Mini Stereo Speaker is not an intrinsically safe device and is not suitable for use in hazardous environments, where such devices are required, including without limitation, in presence of gas fumes, explosive dust situations, operation of nuclear facilities, aircraft navigation or communication services, air traffic control, and life support or weapons systems.

Potentially explosive atmospheres: Turn off the speaker when in any area with a potentially explosive atmosphere, and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include fueling areas such as gasoline or petrol stations; below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust, or metal powders; and any other area where you would normally be advised to turn off your vehicle engine.

Blasting areas: To avoid interfering with blasting operations, turn off Bluetooth technology on the speaker when in a “blasting area” or in areas that post “Turn off two-way radio.” Obey all signs and instructions.

US Information Concerning the Federal Communications Commission ("FCC") Requirements for Hearing Aid Compatibility with Wireless Devices

When wireless devices are used near hearing devices (such as hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference, and wireless devices also vary in the amount of interference that they generate.

The wireless telephone industry has developed ratings to assist hearing device users in finding wireless devices that may be compatible with their hearing devices. Not all wireless devices have been rated. Wireless devices that are rated will have the rating displayed on the box together with other relevant approval markings.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device is vulnerable to interference, you may not be able to use a rated wireless device successfully.

Consulting with your hearing health professional and testing the wireless device with your hearing device is the best way to evaluate it for your personal needs.

Service

Only qualified service personnel should perform repairs to the BlackBerry Mini Stereo Speaker. Disconnect the power supply cables from the computer or electrical outlet and refer the speaker or charging accessory for service to qualified service personnel if any of the following situations occur:

- The power supply cord, plug, or connector is damaged
- Liquid has been spilled or objects have fallen into the speaker or charging accessory
- The speaker or charging accessory has been exposed to rain or water
- The speaker or charging accessory becomes very hot to the touch
- The speaker or charging accessory has been dropped or damaged in any way
- The speaker or charging accessory does not operate normally by following the instructions in the user documentation
- The speaker or charging accessory exhibits a distinct change in performance

Do not attempt to disassemble the speaker or any charging accessory.

To reduce the risk of fire or electric shock, adjust only those controls that are covered in the user documentation for the speaker. An improper adjustment of other controls might cause damage and will often require extensive work by a qualified technician to restore the speaker, charging accessory, or any other accessory to normal operation.

Failure to observe all safety instructions contained in the user documentation for the speaker will void the Limited Warranty and might lead to suspension or denial of services to the offender, legal action, or both.

For Accessory Limited Warranty information, visit www.blackberry.com/legal.

Additional safety guidelines

Child safety: Keep your BlackBerry Mini Stereo Speaker out of reach of children.

Operating machinery: Keep your speaker and any cords or cables away from machinery that is in operation.

LED aperture: Exposure to flashing lights on the speaker can cause epileptic seizures or blackouts and might be dangerous to you or others. In the event that you experience, or your use of the speaker causes in others, any disorientation, loss of awareness, twitching, convulsions, or any involuntary movements, stop using the speaker immediately and consult a physician. If you are susceptible to epileptic seizures or blackouts, consult your physician before using the speaker.
CAUTION: Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Liquids and foreign objects: Never push objects of any kind into the speaker or speaker accessories through openings as this action might cause a short circuit, a fire, or electric shock. Do not use the speaker or speaker accessories near water (for example, near a bathtub or a sink, in a wet basement, or near a swimming pool). Never spill liquid of any kind on the speaker or speaker accessories.

Stability: Do not place the speaker or a speaker accessory on any unstable surface. Take care when using the speaker with any charging accessories to route the power cord in a way that reduces the risk of injury to others, such as by tripping or choking.

Cleaning: Do not use liquid, aerosol cleaners, or solvents on or near the speaker or a speaker accessory. Clean only with a soft dry cloth. Disconnect any cables from the computer and unplug any charging accessories from the electrical outlet before cleaning either the speaker or the charging accessory.

Designated areas and dangerous environments: Observe all signs and instructions that require an electrical device or radio frequency device to be switched off in designated areas. Do not use the speaker in environments where there is a danger of ignition of flammable gases.

Overheating and damage: If the speaker or speaker accessory overheats, if the speaker or speaker accessory has been dropped or damaged, if the speaker or speaker accessory has a damaged cord or plug, or if the speaker or speaker accessory has been dropped in a liquid, discontinue use.

Compliance information

Exposure to radio frequency signals

The BlackBerry Mini Stereo Speaker radio is a low power radio transmitter and receiver. When the speaker radio is turned on, it receives and also sends out radio frequency (RF) signals. The speaker is designed to comply with Federal Communications Commission (FCC) and Industry Canada (IC) guidelines respecting safety levels of RF exposure for wireless devices, which in turn are consistent with the following safety standards previously set by Canadian, U.S., and international standards bodies:

- ANSI/IEEE C95.1, 1999, American National Standards Institute/Institute of Electrical and Electronics Engineers Standard for Safety Levels with Respect to Human Exposure to Radio Frequency Electromagnetic Fields (3 kHz to 300 GHz)
- National Council on Radiation Protection and Measurements (NCRP) Report 86, 1986, Biological Effects and Exposure Criteria for Radiofrequency Electromagnetic Fields
- Health Canada, Safety Code 6, 1999, Limits of Human Exposure to Radiofrequency Electromagnetic Fields in the Frequency Range from 3 kHz to 300 GHz
- EN 50371, 2002, Generic Standard to demonstrate the compliance of low power electronic and electrical apparatus with the basic restrictions related to human exposure to electromagnetic fields (10 MHz to 300 GHZ)
- International Commission on Non-Ionizing Radiation Protection (ICNIRP), 1998, Guidelines for Limiting Exposure to Time-Varying Electric, Magnetic, and Electromagnetic fields (up to 300 GHz)
- Official Journal of the European Union (OJEU), 1999, Council Recommendation of 12 July 1999 on the limitation of exposure of the general public to electromagnetic fields (0 Hz to 300 GHz)

FCC compliance statement (United States)

FCC Class B Part 15

This device complies with Part 15 of the Federal Communications Commission (FCC) Rules. The FCC ID for this device is TDU-PS3. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer's instructions, may cause interference harmful to radio communications.

There is no guarantee, however, that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio or TV technician for help.

Industry Canada certification

This BlackBerry Mini Stereo Speaker complies with Industry Canada RSS-210 standard, under certification number 6432A-PS3.

Operation is subject to the following two conditions: (1) This device may not cause interference and (2) This device must accept any interference, including interference that may cause undesired operation of the device. See RSS-GEN 7.1.5. The term "IC:" before the certification/registration number only signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. The term "IC:" before the certification/registration number does not imply that Industry Canada approved the equipment.

Class B compliance

This BlackBerry Mini Stereo Speaker complies with the Class B limits for radio noise emissions as set out in the interference-causing equipment standard entitled "Digital Apparatus," ICES-003 of Industry Canada.

EU regulatory conformance

This product is CE marked according to the provisions of the R&TTE Directive (99/5/EC). Research In Motion Limited hereby declares that this BlackBerry Mini Stereo Speaker is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

CE 1177

The Declaration of Conformity made under Directive 1999/5/EC is available for viewing at the following location in the EU community:

Research In Motion UK Limited
200 Bath Road
Slough, Berkshire SL1 3XE
United Kingdom

Additional regulatory conformance

Specific details about compliance to the following standards and regulatory bodies may be obtained from Research In Motion:

- Radio and Telecommunications Terminal Equipment (R&TTE) Directive 1999/5/EC

Product information

Product information

Mechanical properties

weight	approximately 3.5 oz (98 g)
size (L x W x H)	approximately 3.51 x 2.28 x 1.08 in. (89.1 x 57.9 x 27.5 mm)

Power

battery	non-removable, rechargeable lithium-polymer cell
port	Micro-USB–compatible port for charging
capacity	1100 mAh
talk time	16 hours
standby time	40 days
charging time	2.5 hours
streaming time	14 hours

Bluetooth radio specifications

single-band support	ISM 2.4 GHz
Bluetooth version	3.0
Bluetooth class	Bluetooth Class II
range	approximately 33 feet (10 m)

transmitting and receiving frequency	2.402GHz~2.480GHz
profile support	HFP 1.5, HSP, A2DP, AVRCP 1.3
